ABSTRACT

Please replace the abstract that appears on page 9 of the specification with the following revised abstract which is submitted on a separate sheet.

ABSTRACT

~~The invention relates to a~~ A field bus distribution unit (VE) designed for use in process automation technology involving several field devices. ~~Said~~ The unit is equipped with a microcontroller μ C, which is connected to ~~the~~ a field bus (FB) and transmits device-specific information of the field devices that are connected to the field bus distribution unit (VE).
